

# Starry Night™

## GLOW-IN-THE-DARK STARS

*Bring the night sky indoors and sleep under the stars every night with Starry Night™ Glow-In-The-Dark Stars.*

Bagged set Includes:

- Fifteen 1.5 inch stars
- Fifteen 1 inch stars
- Double-sided foam tape on each star

### Instructions for use:

1. Begin by selecting a star pattern. The backside of this card contains four popular star patterns to get you started. Simply use the patterns as a guide to apply the glow-in-the-dark stars.
2. Remove the protective paper backing from each star before placing them on the ceiling or wall. If you make a mistake in your star pattern, you can remove a star and stick it back into a new spot. Remember to ask your parents for permission before placing the stars up!
3. Turn off the lights and watch them glow! Stars glow brightly after being exposed to light. For best results, make the room as dark as possible.

### Tip:

You can use Starry Night™ software to print out star charts for all 88 constellations. Or you may want to make your own star patterns!

### Fun Fact:

Think of the light in the room as the Sun. When the Sun is out the sky is too bright and the background stars can't be seen. When the light is turned off, it is like the Sun is below the horizon and the stars become visible.

### Try this!

Glow-in-the-dark stars are also fun in the bathtub. Turn off the lights and watch the stars glow and float. It is like being inside a star cluster!
