

# Searching for SuperStars Classroom Edition

**Discover Supernovas, Colliding Stars, and More!**

Our galaxy is overdue for a nova. It could be a supernova, or if we're lucky, a hypernova. Do you know what those are? Take a tour of the potential novas in neighboring galaxies and see how they might appear if they exploded. Meet amateur astronomers as well as scientists who discuss how every known molecule is created as a result of the explosions.

From the creators of Starry Night® software, this 2005 Telly Award Finalist for Education Video comes complete with a teaching guide full of discussion questions, cross-curricular activities and correlations to national science standards. It is a wonderful educational resource that will inspire and excite your students about space science.

Run Time: 55 minutes.

#### Features:

- Bonus Image Galleries
- Chapters Index
- Widescreen Format
- Digital 5.1 Surround Sound and Digital Video
- With Teaching Guide!
