

# Wheels on Mars Classroom Edition

## Close encounters with Spirit & Opportunity

Meet the scientists from NASA's Jet Propulsion Lab and Cornell University who built the Mars Rovers, and visit the testing sites. Find out what we expected to learn as it compares to what we are actually finding out. Go behind the scenes at Rover Mission Control as data comes down from the Red Planet. Get a feel for what it's like to drive the Rovers on the harsh, cold, dry desert world 100 million miles away.

From the creators of Starry Night® software and sequel to the 2005 Telly Award for Multimedia winning *Eyes on Mars*, this DVD comes complete with a teaching guide, discussion questions, cross-curricular activities and correlations to national science standards. It is a wonderful educational resource that will inspire and excite your students about space science.

Run Time: 98 minutes.

### Features:

- Bonus Image Galleries
- Chapters Index
- Widescreen Format
- Digital 5.1 Surround Sound and Digital Video
- With Teaching Guide!
